☑ Green Certification ☑ Energy Star ☑ Garage Included

The Cadet home plan provides a much larger appeal than the European cottage style that inspired its design. With a two-car garage, 3 or 4 bedrooms and 2½ baths, the Cadet offers an open great room, professionally designed kitchen with a large eat-at counter and a breakfast area with optional built-in cabinetry. An upstairs balcony overlooks the two-story foyer and the separate dining room can easily be used as a study.
