"The Belaire is one of our most sought after new two-story plans. The plan begins with a welcoming entry foyer which gradually invites visitors into the living room, or ushers them into the combined dining and family room for more expansive entertaining. The peninsula kitchen is well laid out, and opens to the rear foyer area complete with storage locker areas to keep things neat and tidy. Upstairs, the Belaire has four well-sized bedrooms, including the master suite with walk-in closet and a master bath made for those times when you just need to escape for awhile to the tranquility of a private bath. With two and a half baths, an abundance of space in traffic areas, and the ability to have secluded or more open entertaining, the Belaire is a great plan by itself. Now imagine how much better it will be when you add your own personal touches!"
